

- PHOTOGRAPHY - CLASSES FOR BEGINNERS

- Are the photographs of your FRIENDS and FAMILY rather average?
- Are mediocre photographs your only memory of your recent HOLIDAY?
- Can't you make any sense of all the buttons and settings on your camera?

Don't despair, help is at hand!

For a fraction of the price of your camera, I'll take you on a photographic journey, discovering all the photography terminologies, camera settings and a few "tricks of the trade."

The course covers:

- Important **Camera settings**, their functions and creative effects
- **Exposure** (F-stops and Shutter Speeds), and effects of high **ISO** settings
- **Rules for composing** a photo for best visual impact
- Better **flash photography**
- Why taking photographs in **Automatic/Program modes restricts** your creative options
- We **analyze your own photographs** and discuss ways of improving them
- The power of post-editing, through Basic **Photoshop**
- **Photography terms** are explained (i.e. White Balance, Depth of Field, Histogram, etc)
- Limited seats, so booking is essential. .
- **Refreshments** provided and, **Certificates** are issued to successful students
